U. S. S. NEVADA SAILORS DROWN

(By Associated Press.)
NEW YORK, April 28.—Thirteen sailors were drowned by the sinking in the Hudson river of a naval launch returning to the battleship Nevada, according to the police. One was rescued. The absence of a naval announcement, the police said, was based on the information of persons who witnessed and heard the cries of the drowning. The launch apparently, collided with something before reaching the battleship.

The official naval announcement said four were drowned when the motor dory of the destroyer Bell was sunk in collision with the steamship Hendey.

TRIBUTE TO A CHRISTIAN LIFE

The funeral of the late Mrs. Elizabeth L. Timlin was held from the family residence this morning followed by requiem mass at St. Patrick's church before proceeding to the local cemetery where the interment occurred. The attendance was of the most representative seen here for a long time and the display of flowers were of a lavish order as many of the fragrant testimonials that arrived too late to be sent to the house were borne to the cemetery after the passing of the cortege. At the church Father Noonan conducted the solemn rites and also took occasion to pay a warm personal tribute to the deceased whom he described as a member of his congregation whose life was most edifying and whose acts made her a living exemplar of Christian principles. As the body was carried into the church the choir sang "Lead Kindly Light" and at the recessional "Nearer My God to Thee" was rendered. The pallbearers were W. H. Thomas, Angus McDonald, L. Norris, W. T. Cuddy, E. W. O'Connell and Emery Marty.

BIG CROWDS GO KLONDIKE WAY

Everybody who had a flivver was on the road yesterday and most of these vehicles were headed for the Klondike country where they expected to see the highgrade find which was optioned to Harry Stimler Saturday afternoon. None of those who went out found any indication to make locations, for the country had been taken up and crisscrossed with boundary lines.

The options taken by Stimler and associates are as follows:
Terrible No. 1.—From H. E. McClain, E. S. Harney and E. D. Yeiser, Clark Divide.—From Thomas Clark, J. J. Peterson, Edward Mullen, H. S. James and James H. Engler. They cover the Clark Divides from No. 1 to 6.

Goldfield Nos. 1 to 5.—From E. H. Kelly and S. H. Arm.

Anacoda Nos. 1 to 4.—From Thomas Clark, J. J. Peterson and H. S. James.

Big Six, Nos. 1 to 8.—From C. S. Blylock and R. Allison.

Grant, Nos. 1 to 4.—From E. S. Harney, E. D. Yeiser and H. E. McClain.

Wampus Nos. 1 to 4.—From W. R. Mercer, J. J. Johnston, Jack Timlin, George Poslow and George Knorr.

The Clark Divide was located April 18 by Thomas Clark who arrived only three weeks ago from the shipyards where he had been working for the past year after temporarily giving up prospecting. The options were secured for Harry Stimler by Briz Putman and William Corcoran, one of the best known prospectors of the Bullfrog district who received \$75,000 for his share of the proceeds of selling the National Bank group in that section to Patrick Elliott & Camp in 1905. The location of the Clark Divide is exactly two miles south of the old Klondike mine where the porphyry begins to show. The present holders of the option do not claim they have found a high grade deposit, but they think the indications warrant substantial work. The location hole is down only seven feet and, if the prospect continues to improve it is proposed to organize a district to be known as the New Goldfield Divide district.

ED. J. ROBERTS, general manager of the Revert and Verdi Divides and the Belcher Extension is expected home from San Francisco Wednesday.

COVENANT ADOPTED WITHOUT REVISION

(By Associated Press.)

BEGIN CLEARING THE HASBROUCK

The race on the Hasbrouck cross cut run from the 200 foot level in the shaft turns out to be greater than expected and one that will necessitate a vast amount of timbering. From present indications it would appear that the cave in is not less than fourteen feet long. The company is entering its attention on this work and will keep as many men as Manager Bruce can profitably employ in clearing out the muck and broken timbers. Eleven men are now employed in the tunnel 300 feet above the crosscut two faces of ore have been cut. This is 300 feet above the crosscut from the shaft and presages great tonnage for the company when it gets into its stride for shipping. The first work of the engineers will be to get a true survey so that the work can be planned in such a way as to serve as an accurate guide for systematic development. In the shaft where the timbering has been completed station will be cut at 400 feet and a crosscut driven to the south for a distance of 600 feet where it is thought the main ledge may be picked up.

Etchebarren of Reno. The sale was made by Thomas J. Lynch, Ed. J. Roberts, C. A. Perry and C. J. Blumenthal. This property is well situated on the Hasbrouck strike and is regarded as one of the coming properties of the camp.

The sentences will be in accordance with provisions of military law. All accused of committing an act in violation of the laws or customs of war who are specified "either by name or rank, office or employment, which they held under German authorities" will be demanded of the German government for trial by a military tribunal of the power.

SUN SPOTS ARE STORM CENTERS

(By Associated Press.)
WASHINGTON, D. C., April 28.—The National Academy of Sciences today opened a three day session for discussing sun spots, their influences upon the earth and reports on other scientific researches. Interest attaches particularly to a paper read by Professor George Hale, the California astronomer. Because of his statement that he can tell the weather in the sun by the study of spots, Professor Hale's discovery and his view are now universally accepted that sun spots are a gigantic electric vortex closely resembling a terrestrial tornado but on such a colossal scale that the earth could be dropped into one of average size.

DIVIDE STOCKS FAIRLY STRONG

With sales of 803,700 shares the market was remarkably stable this morning, especially in view of the appearance of another batch of late comers which claimed notice from buyers. The general tone was soft but the big leaders held fairly well without any material concession to buyers. Hasbrouck sold up to \$11.50, Gold Zone, \$12.00, Brougher \$11.80 and Tonopah Divide \$10.50. The weakness is ascribed to the Victory loan canvass which is now at its height. The principal business of the day was according to the following table:

Hasbrouck	17,500
Gold Zone	12,500
Divide Ex.	20,000
East Divide	22,500

COMMENTING ON THE COVENANT

(By Associated Press.)
WASHINGTON, April 28.—Some senators, including William Johnson, of California, without comment on the revised League of Nations covenant published today. Senator Moses, of New Hampshire, said it would require amendments to the constitution to make it enforceable. He thought there might be improvement in the phrasing. He still believed it "ranked as with any peace that might occur in any part of the world."

Senator Walsh was quoted as saying the covenant reserved the Monroe Doctrine from authority of the league. He said he believed this would alienate many voters. An on server found the official summary published two weeks ago gave a fairly comprehensive outline of the document.
